

## a From composition to 3D structure

Atom identities · total charge · spin multiplicity

Harmonic source

$$X_0 \sim q_0(\cdot \mid c)$$

Auxiliary edges only

**LatentSpring flow**  
EGNN + corrections

Neural sampling

Raw output

$$X_{\text{gen}} \in \mathbb{R}^{23 \times 3}$$

C7H15N · neutral singlet

## b Correct the predicted endpoint

**Geometry**

$$g = G_{\psi}(H, p; c)$$

$$H_g = H + (1 - p)g$$

**Physics**

$$f = A_{\phi}(X, H_g, p; c)$$

Force-based supervision

**Endpoint update**

$$\Delta H = (1 - p)(g + \eta f)$$

Flow or diffusion

**Training**    Reference geometry → backbone + geometry head  
                  eSEN force targets → physical head
